# THE WILLCOX & GIBBS SEWING-MACHINE.

\$30. WITH TWO NEEDLES, &c.

A PERFECT Family Sewing Machine, that will stitch, fell, gather, cord, and hem any width, *without basting or dropping a stitch*. Its points of superiority are these, —

It forms a flat, even, and elastic seam, which is warranted not to rip in wear, though every third stitch is cut.

A patented device prevents its being run in the wrong direction.

Two thousand stitches, or two yards of work, can be done in one minute, without dropping a stitch.

It is noiseless in its operations.

Although at about half the price of other first-class machines, they will accomplish double the sewing in a given time.

We refer to the following persons who have purchased this machine after a careful examination of others, —

Messrs. BENJ. EDWARDS, DANIEL PERKINS, R. A. MACKENZIE (Merch. Tailors), E. H. PAYSON, JOHN H. NICHOLS, M. C. REYNOLDS, Rev. I. E. DWINKLE, Dr. H. GOVE, NATH. OSBORN, N. H. BROOKS, W. W. LANDER, H. E. JENKS, J. F. WORCESTER, Ed. H. KNOTTS, D. O. HATCHFIELD, JER. RICHARDSON, SHILLABER HALBY, and many others in this vicinity.

It is emphatically the good, low-priced Family Sewing-Machine that the public has long been waiting for. — *London Freeman*.

It is indeed a wonderful production, and for family use especially, no other will bear any comparison with it. — *Philadelphia Evening Journal*.

A mechanical wonder. — *New-York American*.

Among the best and most serviceable Sewing-Machines. Light, and elegantly finished, and so simple in its construction that it seems almost impossible for it to get out of repair. It combines several patents owned by Mr. Willcox, besides being finished under six patents owned by Elias Howe, Jr., Wheeler & Wilson, L. M. Singer & Co., Grover, Baker, & Co. — *Pittsburg Chronicle*.

Has combined with its own peculiar merits all the really valuable improvements of the higher-priced machines. — *Pennsylvania*.

From the *Franklin Institute Exhibition Report of 1866*.

This machine, in the opinion of the committee, fulfills nearly the requirements of a perfect family machine then any on exhibition.

From the *Pennsylvania State Agricultural Society Report*.

Taking into consideration simplicity, cheapness, durability, and doing all work, the committee were unanimously in favor of the Willcox & Gibbs.

The undersigned, having accepted the agency of the WILLCOX & GIBBS SEWING-MACHINE, invite the public to examine them at their Music Room on Central Street, and Bookstore, South Danvers.

# A CHALLENGE TO THE WORLD.

**CHILSON'S**  
Patent Trio Stove.

**SIX SIZES.**

The cut of this remarkably economical Stove will enable every intelligent mind to comprehend at once the great economy in fuel secured by this strictly philosophical invention. Its extensive use has PROVED and we can safely warrant, a saving of FIFTY PER CENT in fuel over any other plan of Stove known.

**CHILSON'S**  
PATENT TRIO  
**PORTABLE FURNACE.**

**THREE SIZES.**

This Furnace is the same in principle as the Trio Stove. We warrant a saving of FIFTY PER CENT IN FUEL over the common Portable Furnaces. It is made of substantial heavy castings, and is not liable to rust and burn out, or leak gas, as is the case with the common portable furnaces, made partially of sheet-iron.

Stoves, Furnaces, Ranges, Mantels, Grates, Registers, Ventilators, &c., as usual. Special attention given to warming and ventilating buildings.

We do a Cash business, and therefore are not obliged to charge our customers a heavy percentage to make up for bad debts. Buying for cash ourselves, and selling at a very slight advance, we prefer small and sure profits, with a brisk trade, to the uncertainties and losses attendant upon the credit system.

We offer a very large, choice, and desirable stock of LADIES' FURNISHING GOODS, and at the lowest prices, and from our favorable position, and unequalled facilities, we can safely defy competition.

## P R E F A C E.

THE Publishers of the Salem Directory now offer the tenth edition to the citizens of Salem and South Danvers, with the assurance that it has been prepared with the usual care, and believing it will be found as correct as is possible to make a work of this kind.

Although there has been but a small increase over the last one, it can be accounted for by the quiet movements of some branches of business. The prospect now is that there will be a larger increase of population and business during the two ensuing years than usual, which will add to the general prosperity of the city. Thanking all for the assistance and encouragement given, they hope it will meet the wants for which it was intended.

# PERUVIAN SYRUP,

OR

## Protected Solution of Protoxide of Iron.

THE ONLY RELIABLE AND PERMANENT CURE FOR

## DYSPEPSIA,

Affections of the Liver, Dropsy,  
Neuralgia, Bronchitis, Con-  
sumptive Tendencies, Boils,  
Scurvy, and Piles,

## GENERAL DEBILITY,

And all Disorders arising from Impoverished and Impure  
Blood.

The proofs of its efficacy are so numerous, so well authenticated, and of such peculiar character, that sufferers cannot reasonably hesitate to receive the proffered aid.

The Peruvian Syrup does not profess to be a cure-all; but its range is extensive, because many diseases, apparently unlike, are intimately related, and, proceeding from one cause, may be cured by one remedy.

The class of diseases for which the Syrup provides a cure is precisely that which has so often baffled the highest order of medical skill. The facts are tangible, the witnesses accessible, and the safety and efficacy of the Syrup incontrovertible.

**NOTICE.** — It is well known that the medicinal effect of Protoxide of Iron is lost by even a brief exposure to air, and that to *maintain* a solution of Protoxide of Iron, without further oxidation, has been deemed impossible.

In the Peruvian Syrup, this desirable point is attained by combination in a way before unknown; and this solution may replace all the proto-carbonates, citrate, and tartrates of the *Materia Medica*.

A. A. HAYES, M. D.,

*Assayer of the State of Mass., 16 Boylston St., Boston.*

*Pa. B. 15, 25,*

## THE YEAR 1861

Constitutes the latter part of the 85th year of the Independence of the United States of America, and the 6574th of the Julian Period; and the 5821st according to the Jews, and the 5835th according to Usher, and the 7369th according to the Septuagint, since the creation of the world, the 2614th of Rome, according to Vairo; and the beginning of the 1278th of the Hegira, the years of which are purely lunar.

### ECLIPSES IN THE YEAR 1861.

There will be four Eclipses this year, three of the Sun and one of the Moon.

I. *An Annular Eclipse of the Sun*, Jan. 10. Invisible in America, Europe, Asia, and Africa; but it will be total and central in Australia.

This Eclipse begins, .....	Jan. 10th, 7h. 52m. A.	Mean time
And ends, .....	" 11th, 1h. 40m. M.	at Boston.

II. *An Annular Eclipse of the Sun*, July 7. Invisible in America, Europe, and Africa, but will be central and visible in the southern part of Asia, as follows:—

Beginning, .....	July 7th, 6h. 34m. A.	Mean time
And ending, .....	" 8th, 0h. 17m. M.	at Boston.

III. *A Partial Eclipse of the Moon*, Dec. 17, visible in all North America, as follows:—

Moon enters the Penumbra, ....	Dec. 17th, 1h. 1m. M.	
Moon enters the Shadow, .....	" " 2h. 44m. M.	} Mean time at Boston.
Greatest Eclipse, .....	" " 5h. 25m. M.	
Moon leaves the Shadow, .....	" " 4h. 25m. M.	
Moon leaves the Penumbra, ....	" " 6h. 7m. M.	

But a small portion of the moon will be obscured,—about 2 digits.

IV. *A Total Eclipse of the Sun*, Dec. 31st, visible as a partial one in all North America, but will be total and central in South Africa.

At Boston it will be as follows:—

Eclipse begins on the Earth, ....	Dec. 31st, 6h. 31m. M.	
Central Eclipse begins, .....	" " 7h. 04m. M.	} Mean time at Boston.
Centre Eclipse at noon, .....	" " 9h. 14m. M.	
Central Eclipse ends, .....	" " 10h. 35m. M.	
Ends on the Earth, .....	" " 11h. 45m. M.	

But a small portion of the sun's southern limb will be obscured at Boston,—about two digits.

### THE SEASONS.

Spring begins, .....	March 20th, 0h. 5m. Morn.
Summer " .....	June 21st, 5h. 32m. Morn.
Autumn " .....	Sept. 22d, 7h. 52m. Eve.
Winter " .....	Dec. 21st, 1h. 51m. Eve.

**MORNING AND EVENING STARS.**—Venus will be the Morning Star until May 15: it will then be the Evening Star to the close of the year. Mars will be the Morning Star to July 29; it will then be the Evening Star to August 28; after which it will be the Morning Star to the end of the year. Jupiter will be the Morning Star till Feb. 14; it will then be the Evening Star to August 30; after which it will be the Morning Star to the close of the year. Saturn will be the Morning Star till Feb. 28; it will then be the Evening Star to Sept. 9; it will then be the Morning Star to the close of the year.

## EXPLANATION OF CHRONOLOGICAL CYCLES.\*

I. *Dominical Letter.*—The seven days of the week reckoned as beginning on the first of January, are designated by the first seven letters of the alphabet, A, B, C, D, E, F, G; and the one of these which denotes Sunday is the *Dominical letter*. Thus, if the year begin on Sunday, A is the dominical letter; if it begin on Monday, that letter is G; if on Tuesday, it is F; and so on. If there were 364 days, or exactly 52 weeks in the year, the Dominical letter would be always the same; but the year contains 365½ days; an excess of 1½ day over the 52 weeks. The day is taken into the account every year, and the one-fourth makes a day in every four years; so that the dominical letter falls backward *one letter* for each of the three years in which the date or number of the year cannot be divided by 4, without remainder, and *two letters* every fourth year, when the date can be so divided. The years which have 29 days in February, and the two dominical letters are called *Emsextilis*, or *leap years*, because the day of the month, after February, *leaps over* a day of the week.

II. *The Golden Number.*—At the end of every nineteen years, the new and full moons happen at very nearly the same times of the year. The ancients discovered this, and reckoned the nineteen years, or “Cycle of the Moon,” as it is called, so that it terminated the year before the Christian era. This Cycle was marked by the Greeks with letters of Gold. To find the *golden number*, or number of the year in this Cycle, add 1 to the date; divide by 19: the quotient is the number of Cycles of the Moon since the birth of Christ, and the *remainder is the golden number*.

III. *Solar Cycle.*—The *Cycle of the Sun* is the number of years that elapse before the Sundays throughout the year happen on the same days of the month. If there were 364 days in the year, that would happen every year; if 365, it would happen every seventh year; but because the *one-fourth* of a day makes an alteration of a day every fourth year, the Cycle must extend to 28 years. Nine years of this Cycle had elapsed before the birth of Christ. Therefore, to find the Cycle of the Sun, add 9 to the date; divide by 28; the quotient is the number of Cycles since the birth of Christ, and the *remainder is the Cycle of the Sun*.

IV. *The Epact* is the Moon’s age for the first day of January, or the *equation* between the beginning of the Solar and the Lunar year. The time from one new moon to another is about 29½ days. Thus there are, in a year, twelve revolutions of the moon and 11 days over; therefore

\*Abridged from the Companion to British Almanac.

the 12th new moon will take place 11 days earlier each year than it did the year before. In the lunar cycle of 19 years, there are 12 new moons in each of 12, and 13 in each of 7; because the 11 days of yearly difference in three years exceed a lunar month by  $3\frac{1}{2}$  days. The following method will answer for the day of the moon's age on the 1st of January till the end of the present century: Take 1 from the golden number, multiply what is left by 11, divide by 80; the remainder is the *space*, or moon's age on the first of January.

V. *Roman Indiction.* — The cycle of Indiction has no connection with the motions of the Sun and Moon further than its consisting of 15 years. It was established by the Emperor Constantine, in the year 312, to regulate certain payments by the subjects of the empire. To find it for any year, subtract 312 from the date, divide by 15, and the remainder is the *indiction*.

### ON THE CALENDAR, AND ITS SUCCESSIVE REFORMS.

The divisions of time, such as they are presented in the Calendar, are composed of days, weeks, months, and years. The modes of determining these divisions have been various amongst the nations of antiquity, and there are still variations in these modes in the modern world.

The manner of reckoning the days by the ancient Jews, and which subsists amongst that people at the present time, is, to commence the day at a certain hour of the evening and to finish it on the next evening at the same hour. Thus, their sabbath begins on the afternoon of Friday, and is completed on the afternoon of Saturday. The Roman Catholic Church also commences its *festivals* in the evening, and this custom is retained by the Episcopalians in some of their popular observances, such as the eve of St. John, and Christmas eve.

The civil day now commences at 12 o'clock, midnight, and lasts till the same hour of the following night. The civil day is distinguished from the astronomical day, which begins at noon, and is counted up to 24 hours, terminating at the succeeding noon. This mode of reckoning the day is that used in the Nautical Almanac, and it sometimes leads to mistakes with persons not familiar with this manner of computation. A little consideration will obviate this difficulty. Thus, January 10, fifteen hours in astronomical time is January 11; 3 in the meridian civil time. In France and in most of the states of Europe, as with us, the hours are counted up to 12, from midnight till noon, and from noon till midnight. In parts of Italy and of Germany, the day is held to commence about sunset, and the hours are counted on till the next sunset. This mode is very inconvenient to travellers as the noon of the "*Italian hours*" at the summer Sol-tice is 16 o'clock, and 19 o'clock at the winter Sol-tice.

The English names of the days of the week are derived from the Saxons; and they partly adopted those names from the more civilised nations of antiquity. The following ingenious origin of the ancient names has been suggested in connection with astronomical science. The planetary arrangement of Ptolemy was thus: 1, Saturn; 2, Jupiter; 3, Mars; 4, the Sun; 5, Venus; 6, Mercury; 7, the Moon; each of these planets was supposed to preside, successively, over each hour of the 24 of each day, in the order above given. In this way Saturn would preside over the first hour of the first day; Jupiter over the second hour;

Mars over the third; the Sun over the fourth, and so on. Thus the Sun, presiding over the 4th, 11th, and 18th hours of the first day, would preside over the first hour of the second day; and carrying on the series, the Moon would preside over the first hour of the third day; Mars over the first hour of the fourth day; Mercury over the first hour of the fifth day; Jupiter over the first hour of the sixth day; and Venus over the first hour of the seventh day. Hence, the names of the days yet used in the learned professions throughout Europe. The present English names are derived from the Saxon:—

Latin.	English.	Saxon.
Dies Saturni,	Saturday,	Seterne's day.
Dies Solis,	Sunday,	Sun's day.
Dies Lunæ,	Monday,	Moon's day.
Dies Martis,	Tuesday,	Tiw's day.
Dies Mercurii,	Wednesday,	Woden's day.
Dies Jovis,	Thursday,	Thor's day.
Dies Veneris,	Friday,	Friga's day.

*Tiw*, *Woden*, *Thor*, and *Friga*, were deities of the Pagan Saxons. *Thor* was the god of thunder, as well as the ancient Jove; and *Friga* was a goddess, the wife of *Woden*.

Almost all nations have regulated their MONTHS, in great degree, by the revolution of the Moon. Some have endeavored to unite this division with the annual course of the Sun, by an augmentation of days at the end of each year, or by adding a thirteenth month at the end of every third year. The Jews and the Athenians followed this latter method. The Macedonians, and some nations of Asia, assigned their months 30 and 31 days. The Turks and the Arabs have 29 and 30 days. The months of the Anglo-Saxons were governed by the revolutions of the Moon. Their common year consisted of twelve lunar months, three months being appropriated to each of the four seasons; but every third year contained an additional lunar month, which was given to the summer season. The names of their lunar months either had reference to their religious ceremonies, or to the natural appearances of the year.

A considerable variation prevailed generally amongst the nations of antiquity, and still partially prevails, with regard to the commencement of the YEAR. The Jews dated the beginning of the sacred year in the month of March; the Athenians, in the month of June; the Macedonians, on the 24th of September; the Christians of Egypt and Ethiopia, on the 29th or 30th of August; and the Persians and Armenians, on the 11th of August. The Jewish civil year begins on the first day of the month *Tisri*; the Mahomedan begins on the first of the month *Moharem*. Nearly all the nations of the Christian world now commence the year on the first of January; but as recently as 1752, even in England, the year did not legally and generally commence till the 25th of March. In Scotland, at that period, the year began on the 1st of January. This difference caused great practical inconveniences, and January and February, and part of March, sometimes bore two dates, as we often find in old records, as 1711-12. This practice often leads to chronological mistakes.

The year, properly so called, is the solar year, or the period of time in which the Sun passes through the twelve signs of the Zodiac. This period comprises 365 days, 5 hours, 48 minutes, 51 seconds, 6 decimals, and is called the astronomical year.

The Calendar is a table of the days of the year arranged to assist the

distribution of time, and to indicate remarkable days connected with devotion or business. If every nation had adopted the same divisions of time, and a uniform Calendar had been general throughout civilized states, history would present much fewer difficulties and contradiotions. The progress of astronomical science has necessarily produced great changes in the manner of dividing time; and thus, whilst some nations have been ready to give their Calendar every possible advantage of a scientific construction, the prejudices of others have rendered them unwilling to depart from their accustomed mode, however inaccurate. It may be curious and instructive to trace, very briefly, the changes of the Calendar; ordinarily called the changes of style.

The Romans called the first days of each month *Calends*, from a word which signified *called*; because the pontiffs on those days called the people together, to apprise them of the days of festival in that month. Hence we derive the name of CALENDAR.

The Roman Calendar, which has in great part been adopted by almost all nations, is stated to have been introduced by Romulus, the founder of the city. He divided the year into ten months only; Mars, Aprilis, Maius, Junius, Quintilis (afterwards called Julius), Sextilis (afterwards called Augustus), September, October, November, December. Mars, Maius, Quintilis, and October, contained 31 days each, and each of the six other months, 30 days; so that the ten months comprised 304 days. The year of Romulus was, therefore, of 304 days' less duration than the lunar year; and of 61 days' less than the solar year; and its commencement of course did not correspond with any fixed season. Numa Pompilius corrected this Calendar, by adding two months—January and February—which he placed before Mars. Julius Cæsar, being desirous to render the Calendar still more correct, consulted the astronomers of his time, who fixed the solar year at 365 days, 6 hours, comprising, as they thought, the period from one vernal equinox to another. The six hours were set aside, and at the end of four years, forming a day, the fourth year was made to consist of 366 days. The day thus added was called Intercalary, and was added to the month of February, by doubling the 24th of that month, or, according to their way of reckoning, the 23rd of the Calends of March. Hence the year was called *Bisextile*. This almost perfect arrangement, which was denominated the Julian style, prevailed generally through the Christian world till the time of Pope Gregory XIII. The Calendar of Julius Cæsar was defective in this particular; that the solar year, consisting of 365 days, 6 hours, and 49 minutes, and not of 365 days, 6 hours, as was supposed in the time of Julius Cæsar, there was a difference between the apparent year and the real year, of eleven minutes. This difference, at the time of Gregory XIII., had amounted to ten entire days, the vernal equinox falling on the 11th instead of the 21st of March, at which period it fell correctly at the time of the council of Nice, in the year 325. To obviate this inconvenience, Gregory ordained, in 1582, that the 15th of October should be counted instead of the 6th, for the future; and, to prevent the recurrence of this error, it was further determined that the year beginning a century should not be *bisextile*, with the exception of that beginning each fourth century. Thus, 1700 and 1800 have not been *bisextile*, nor will 1900 be so; but the year 2000 will be *bisextile*. In this manner three days are retrenched in four hundred years, because the lapse of eleven minutes makes three days in about that period. The year of the Calendar is thus made to correspond, as nearly as possible, to the true solar year; and future errors of chronology are avoided.

The adoption of this change, which is called the Gregorian, or New Style (the Julian being called the Old Style), was for some time resisted by states not under the authority of the See of Rome. The change of the style in England was established by an Act of Parliament, passed in 1752. It was then enacted that the year should commence on the 1st of January, instead of March 25th; and that in the year 1752, the days should be numbered as usual until September 2, when the day following should be accounted the 14th September, omitting eleven days. The Gregorian principle of dropping one day in every hundredth year, except the fourth hundredth, was also enacted. The alteration was for a long time opposed by the prejudices of individuals; and even now, in England, with some persons, the Old Style is so pertinaciously adhered to, that rents are made payable on the old quarter-days instead of the new. The Russians still retain the Old Style, thus creating an inconvenience in their public and commercial intercourse with other nations, which we trust that the growing intelligence of the people will eventually correct.

During the period in which France was a Republic, the authorities introduced an entire change in the Calendar, which was in existence more than twelve years, and is important to be noticed, as all the public Acts of the French nation were dated according to this altered style. The National convention, by a decree of October 5th, 1793, established a new era, which was called, in the place of the Christian era, the era of the French. The commencement of each year, on the first "*Vendémiaire*," was fixed at the midnight commencing the day on which the autumnal equinox fell, as determined at the Observatory of Paris. This era commenced the 22nd September, 1792, being the epoch of the foundation of the Republic; but its establishment was not decreed till the 4th "*Frimaire*" of the year II. (24th November, 1793.) Two days afterwards, the public acts were thus dated. This Calendar existed till the 10th "*Nivose*" year XIV. (the 31st December, 1805), when the Gregorian mode of computation was restored.

## STATE NORMAL SCHOOL AT SALEM.

Resolves to establish a State Normal School in the County of Essex were finally passed by the Legislature, April 16, 1853. The Board of Education, at their meeting held on Thursday, June 2, 1853, decided to locate the same in Salem. The City of Salem furnished the site formerly occupied for the Registry of Deeds, on the corner of Summer and Broad Streets; erected and furnished the building to the acceptance of the

Board, receiving the six thousand dollars appropriated for that purpose by the Legislature, and also two thousand dollars given by the Eastern Railroad Company. On Saturday, September 3, 1853, workmen commenced the removal of the old building. The new edifice, two stories high, sixty-seven feet square, built of brick, was dedicated on Thursday, September 14, 1854; Gov. Washburn presiding, and the address by Ex-Gov. Boutwell. An important addition to the building was made in 1860, for the better accommodation of the valuable and increasing library, apparatus, and cabinet of natural history belonging to the school.

TEACHERS — Alpheus Crosby, *Principal*. Martha Kingman, Sarah R. Smith, Olive P. Bray, Ellen M. Dodge, Mary E. Webb, Anna M. Brown, Elizabeth Carleton, Caroline J. Cole, Eunice T. Plumer, *Assistants*. Lucy Kingman, *Teacher of Music*.

Number of scholars, 137. Scholars are admitted twice a year, on the last Wednesday of February and first Wednesday of September. Tuition, free. Scholars are required to declare their intention to teach in the schools of the Commonwealth. This school is intended for females.

## SOCIETIES AND COMPANIES.

## PLUMMER HALL.

This building was erected in 1856, from funds left by the late Miss Caroline Plummer to the Proprietors of the Salem Athenæum.

The first story is appropriated to the collections of the Essex Institute, and has two ante-rooms—one of which contains the herbarium, the other the historical collections. A large hall in the rear has been finished expressly for the arrangement of the specimens in geology, mineralogy, and zoology.

The second story has a similar arrangement of rooms. The western ante-room is appropriated to the use of the librarian, and some of the principal works of reference, and the new books belonging to the Salem Athenæum; the eastern, to bound volumes of newspapers belonging to the Essex Institute, and the library of the Essex South District Medical Society. The large library room is in the rear. The alcoves on the western side contain the library of the Salem Athenæum; those on the eastern, that of the Essex Institute. The libraries of the two societies number about 25,000 volumes.

## SALEM ATHENÆUM,

Incorporated in 1810, was formed by the union of the Social and Philosophical Libraries. The former was organized in 1760, the latter in 1781. Number of volumes, 12,500, which are deposited in Plummer Hall, 134 Essex Street.

Annual meeting for the choice of officers, last Wednesday but one in May.

Library open every day between the hours of 9, A. M., and 1, P. M., and from 2 to 5, P. M.

### SALEM LYCEUM

Was formed the 18th of January, 1830, and organized as an Incorporated Association on the 2d of April, 1830. The introductory lecture was delivered in the Sewall Street Meeting House, by Hon. D. A. White.

The purchase of an annual ticket makes a person a member of the corporation; and the price of a ticket has never been more than ONE DOLLAR. Over six hundred lectures have been delivered in the annual courses.

The Legislature, on the 20th of April, 1852, passed an act, making Daniel A. White, Stephen C. Phillips, George Peabody, their associate petitioners and successors, and the male citizens of the city of Salem, of twenty-one years of age, purchasers of tickets to the twenty-third course of lectures, a corporation by the name of the Salem Lyceum. At a meeting of the corporation, held May, 1858, the following officers were elected:—

### SALEM FEMALE CHARITABLE SOCIETY.

This Society was one of the first of our charitable institutions, having been formed as early as 1801, and incorporated in 1804. Its objects were the support of female children, and to assist that unfortunate class, the aged and infirm widows.

Its first Board were Mrs. Sarah Fiske, *First Directress*; Mrs. Lucretia Osgood, *Second Directress*; Mrs. Lydia Nichols, *Treasurer*; Mrs. Abigail M. Dabney, *Secretary*; Mrs. Elizabeth White, Mrs. Deborah Hovey, Mrs. Hannah Robinson, Mrs. Hannah Ropes, Mrs. Eunice Richardson, Mrs. Sarah Crowninshield, Mrs. Hannah Hodges, Mrs. Sarah Dunlap, *Managers.* These ladies were succeeded by others, some long since deceased; the most recent, the late Mrs. Rebecca Dodge, and Mrs. Richard S. Rogers.

The Society continued its operations, as above stated, until 1831 or 1832, when by a vote of the Board, and by the authority granted them by the Legislature, it was decided to appropriate its income for the relief of indigent females. The Society meetings are held monthly.

The present Board consists of Mrs. R. Brookhouse, *First Directress*; Mrs. P. P. Pinel, *Second Directress*; Miss S. Frye, *Treasurer*; Miss H. O. Mack, *Secretary*; Mrs. S. P. Webb, Mrs. Emily Johnson, Mrs. S. A. Safford, Mrs. G. B. Loring, Mrs. O. P. Lord, Miss Mary C. Anderson, Miss Lydia H. Chase, Mrs. Rebecca Kinsman, Mrs. Eben Putnam, *Managers.*

### SALEM DISPENSARY.

Organized, February, 1820. Incorporated, February, 1831.

Its object has been the relief of the poor by furnishing Medicines and Medical Advice gratuitously.

It has lately been reconstructed on the plan of similar institutions in larger cities, and a Central Office established at the Town Hall, where the clerk is in attendance every day, Sundays excepted, from 3 to 6, P. M., to receive all applications for the privileges afforded by the institution. Any person approved by the Executive Committee, who shall pay the sum of three dollars per annum, may be entitled to the benefit of the institution for himself and family. A "free list" is kept of those who may be unable to pay this small assessment, who will be provided for gratuitously. The expenses to be paid by an annual subscription.

The city is divided into two districts, the Eastern and the Western, to each of which is assigned a Physician, and an Apothecary. The Eastern District includes all persons who may apply for relief, living eastward of St. Peter and Central Streets, and in South Salem. The Western District includes those living westward of the above streets, and in North Salem.

Annual meeting, first Thursday in January.

### ESSEX AGRICULTURAL SOCIETY.

Organized at Topsfield on Monday, February 16, 1818, by the election of Colonel Timothy Pickering, *President*; and to this office he was annually elected for ten successive years. Incorporated, June 12, 1818. The first exhibition was held at Topsfield, October 5, 1820, and they have been continued annually in the month of September or October in several towns in the county,—usually twice successively in the same place. The

society is receiving from year to year large accessions to its list of members. About 1500 names are on its catalogue.

This society was the first in the State to publish in detail its transactions, which have now extended to four large octavo volumes, containing much valuable information to the agriculturist.

A library was commenced in the autumn of 1849, by the purchase of the agricultural portion of the library of the late lamented Henry Colman, which, with a few additions from other sources, numbers about seven hundred volumes, deposited in the Court-House, Salem.

## PEABODY INSTITUTE, SOUTH DANVERS.

*Trustees*.—Alfred A. Abbott, *Chairman*. Joel Putnam, Francis Dane, Israel W. Andrews, Henry A. Hardy, Franklin Osborn, Isaac Hardy, Eben S. Upton, Joshua Silvester, Henry A. King, Eben S. Poor, Sydney C. Bancroft. Franklin Osborn, *Treasurer*.

*Lycæum and Library Committee*.—Robert S. Daniels, *President*. George A. Osborne, George F. Osborne, Fitch Poole, Francis Baker, Amos Merrill, Sam'l Brown 3d, Thos. M. Stimpson, John B. Peabody, Benjamin C. Perkins, Wm. L. Weston, James D. Black, Samuel P. Fowler, Jesse W. Snow, Arthur A. Putnam, Charles P. Preston. George A. Osborne, *Treasurer*. Thomas M. Stimpson, *Secretary*. Fitch Poole, *Librarian*.

The Peabody Institute was founded June 16, 1851, by a donation of \$20,000 presented by GEORGE PEABODY, Esq., of London, a native of South Danvers. By subsequent donations and annuities, his gifts to the Institute are equivalent to about \$80,000. About \$30,000 of this amount was devoted to the purchasing of a site and the erection of a suitable building for Lectures and a Library, both to be free to the inhabitants of the original town of Danvers.

The Institute Building is a stately edifice, eighty-two feet in length by fifty in breadth, built of brick, and ornamented with brown Connecticut freestone. Its Lecture Hall is calculated to seat about eight hundred persons. It has, over the rostrum, a full-length portrait of Mr. Peabody, for which he sat to Mr. Healey, and is considered one of the best productions of that artist. It has also a half-length portrait of Hon. Rufus Choate, from the easel of Mr. Ames. The building was dedicated to its appropriate uses on the 29th of September, 1854, when the dedicatory address was delivered by Mr. Choate. Since that time annual courses of lectures have been delivered in the hall to large audiences.

The Library Room is situated on the first story, and now contains about 7500 volumes. This number does not include the Branch Library at Danvers, which contains nearly 3000 volumes.

The number of books delivered to borrowers annually is about 20,000, which are nearly all returned to the shelves on the days of the annual examination of the Library.

The income of the permanent fund, real estate, and annuities is about \$2400 annually, which is applied to the increase and care of the Library, the employment of Lecturers, and the necessary expenses of the Institution.

## TRUSSES, SUPPORTERS, & BRACES.

The great number of radical cures of Hernia within the last few years, by the use of Dr. J. W. PHELPS'S SPIRAL SPRING TRUSSES, has given them preference over all others. His apparatus for the correction and cure of all kinds of deformities are used at the Massachusetts General Hospital, and are recommended by the first surgeons in Europe and America.

# MAYNARD & NOYES'

## PERMANENT BLACK

# WRITING-INK.

MANUFACTURE ESTABLISHED, 1816.

Testimony of Parties who have used it for more than a quarter of a century.

REGISTRY OF DEEDS OFFICE, Boston, Jan. 10, 1850.

Messrs. MAYNARD & NOYES: *Gentlemen*,—I am glad that longer use of your Writing-Ink enables me to repeat the testimony given in its favor many years ago. I have used it in this office thirty-seven years, and my oldest records are as legible and black as when first written. This rare quality for permanence renders it invaluable for State and County Records, and all mercantile purposes where it is important that the writing should remain legible and unchanged in color by the lapse of time.

HENRY ALLINE, *Register of Deeds*.

BOWDOIN PUBLIC SCHOOL, Boston, Jan. 7, 1857.

Messrs. MAYNARD & NOYES: *Gentlemen*,—I have used your Ink in the Writing Department of this School the past thirty years, and take great pleasure in renewing my testimonial of its superior quality. It flows freely from the pen, its color is brilliant and permanent, and it combines all the necessary and desirable qualities of good Ink.

JAMES ROBINSON, *Writing-Master*.

The following extract of a letter from a well-known and long-established Bookseller in Dover, N. H., is like many others often received, and will be found to express the opinion and correspond with the experience of a large number in the business:—

"After trying various kinds of Ink, most of my customers come back to yours. I am tired of the miserable compounds offered every little while, pretending to be superior to all other Inks, and will have nothing further to do with them. I have used your Ink on my books over twenty-six years, and my customers can see how it stands against time. Entries made in 1832 are as fresh as those made during this year.

"E. J. LANE,

"DOVER, N. H., Oct. 18, 1858."

The following testimonial from Dr. Chilton is added as a supplement to any of his professional trials:—

"From experiments instituted by me in 1855 and 1856, and repeated within the past six months, I am fully satisfied that Maynard & Noyes' Writing-Ink is entitled to the pre-eminence it has always sustained for LEGIBILITY and PERMANENCE of color.

"NEW YORK, May 11, 1858."

"JAMES R. CHILTON, M. D., *Chemist*.

**MAYNARD & NOYES' COPYING-INK.**—This Ink yields a copy as distinct and perfect as the original. It also combines all the properties of our Writing-Ink, for which it can be substituted.

**MAYNARD & NOYES' CARMINE INK.**—This article is a beautiful red or crimson color, and surpassingly brilliant and rich. It is free from sediment, and will not mould, fade, or turn dark by exposure to the air.

The above popular Inks, together with Blue, Red, Indelible, and Stencil Ink, Chemical Writing-Fluid, Ink-Powder, &c., are for sale by the manufacturers.
